alain it just occurred to me your answer "take a hike"
may cause the fuckers CALDERWOOD and LEWIS
to seek seizure of the mythic-beasts VM and/or libre-soc.org
domain.

can you kindly set up a clone VM? and check the backups
are functioning on the server under your living room table? :)

tia,

l.

You should prolly do as mythic beasts suggest and update the email address that they have for you to be your gmail one.

I believe that Calderwood is upset because of what you have said on mail lists (most of which I do not read and so do not know what you have said). I suspect that if you moderated what you said (or maybe the tone) that they might be less upset - as I said: I do not know.
